

# What does bUnit not offer?

- It is not a general purpose framework.
- It does **not** run in a browser. Does not run JavaScript.
  - But we can assert that our JavaScript functions got called.

# Why not Selenium / Playwright?

- They are slow!
- Expensive to build and maintain!
- They are not unit test frameworks. They are meant for e2e tests.

A screenshot of a test runner interface, likely Test Explorer in Visual Studio, showing a list of tests and their durations. The tests are organized into groups, and each test is marked with a green checkmark, indicating it passed. The durations are listed in milliseconds (ms).
