```
<h1>Counter</h1>
Current count: @ currentCounter
<button id="increment-button"</pre>
        class="btn btn-primary"
        @onclick="IncrementCount">Click me</button</pre>
@code {
    private int currentCounter { get; set; }
    private void IncrementCount()
         currentCounter++;
```

```
Qusing Bunit
Qusing bUnit.Tutorial
@using Xunit
@inherits TestContext
@code {
    [Fact]
    public void SomeTest()
        var cut = new Counter();
        cut.
```

Counter - Why bUnit

```
@using Bunit
@using bUnit.Tutorial
@using Xunit

@inherits TestContext

@code {
    [Fact]
    public void SomeTest()
    {
       var cut = new Counter();
       cut.
    }
}
```

- Everything is private
- How to click the button from the outside world?

The test
